

I Select the most appropriate sized box for each set of items.

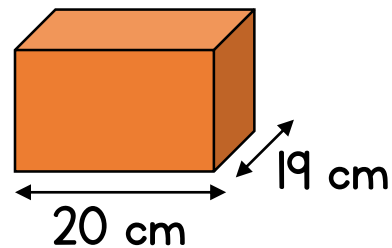

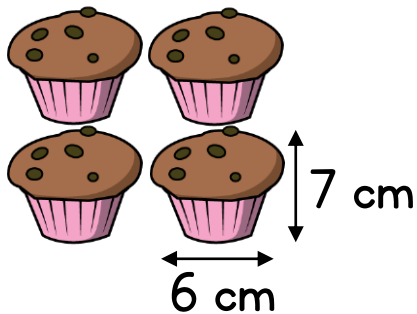

A

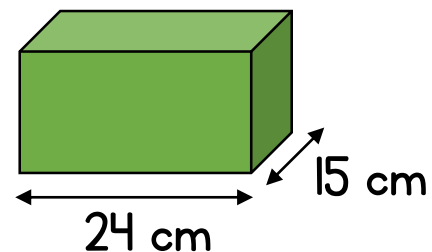

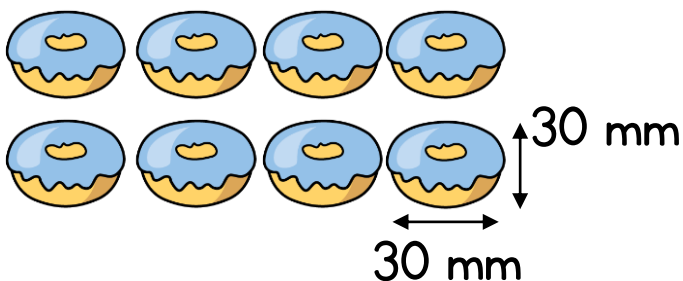

B

C

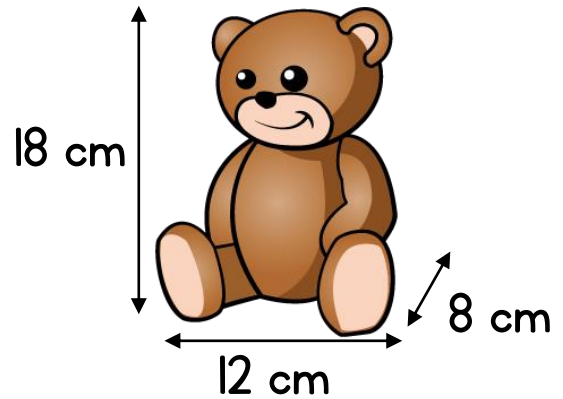

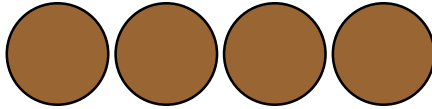

D

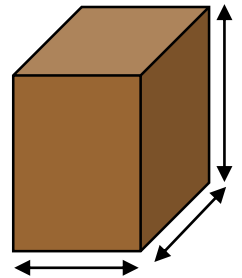

2 Here are the dimensions of a teddy bear.

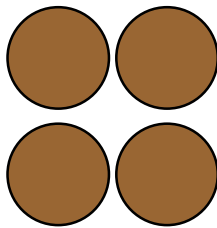

Looking into the box from above, the bears are arranged like this

Sketch the net of the box needed to fit them in giving the dimensions.

The bears could also be arranged like this

Sketch the net of the box needed to fit them in giving the dimensions.

Which box would be cheaper to produce? Why?
